

Description

Magnum pH features a revolutionary magnesium amino acid chelate produced by a unique, proprietary process designed to enhance absorption and intestinal tolerance.

Ingredients

Magnum pH is a highly absorbable magnesium supplement in the form of magnesium bis-Glycinate.* It provides all the health benefits of magnesium, but unlike many forms of supplementary magnesium – it's easy on the GI tract.

Magnum pH supports:

- Those with limited intestinal tolerance to other forms of magnesium (not dependent on stomach acid for absorption)
- Glucose/insulin management by affecting insulin secretion and action
- Healthy blood pressure by influencing cardiovascular tone
- Bone Health - Assists in the metabolism and uptake of calcium
- Magnesium loss from calcium fortified antacids - balances the intake of calcium
- Whole body detoxification and assists in maintaining adequate liver function
- Helps minimize minor cerebral discomfort (i.e. headaches)
- Relieves menstrual and nocturnal leg muscle cramps by relaxing muscles

Dosage

SUGGESTED USE: Take 2 tablets twice daily or as directed by your healthcare practitioner.

These statements have not been evaluated by the FDA. This product is not intended to treat, diagnose, prevent, or cure any disease. Consult a physician before taking. Should you experience any serious physical side effects from taking these nutritional supplements, discontinue and call your doctor immediately.
